

Attenex® Patterns® v3.5 New Feature Overview

VERSION COMPARISON CHART

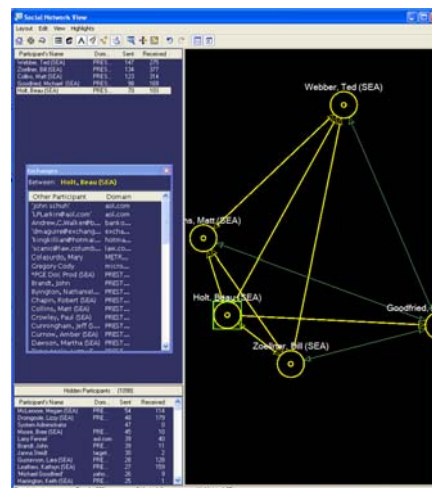

Attenex Patterns v3.5 strengthens the foundation of our industry-leading document review and analysis software by adding new investigative visualizations, concept folders and expanded processing support for Microsoft Outlook file types. There's really no comparison, but here's how Attenex Patterns v3.5 stacks up against previous versions.

Features in Attenex Patterns		v3.5	v3.0	v2.5
Social Network View				
	<i>Displays email communication to and from particular individuals or domains. Finds critical emails other methods can miss, especially important during investigations.</i>	☑		
Timeline View				
	<i>Organizes all emails and documents chronologically. Visually shows the volume of communication over time.</i>	☑		
Enhanced Unattended File Processing				
	<i>Automates electronic content loading and document review assignment preparation steps.</i>	☑		
Cluster Folder View				
	<i>Documents and emails automatically organized into folders based on concepts and similarities. Works alongside or in place of the traditional Patterns "dot" view.</i>	☑		
Expanded Processing Support for Microsoft Outlook				
	<i>Review Microsoft Outlook calendar appointments and .MSG files from Outlook PSTs to investigate meeting dates, attendance and email communication.</i>	☑		
Workbench User Interface Redesign				
	<i>Redesigned user interface to simplify and further automate data loading, preparation and exporting steps.</i>	☑	☑	
Increased Project Visibility through Matter Manager				
	<i>Provides case leads and project managers with real-time insight into review team productivity and progress.</i>	☑	☑	
Template-Driven File Loading & Selection				
	<i>A templated approach to content preparation ensures consistent, streamlined operations, reducing time spent before document review can begin.</i>	☑	☑	
Ability to Annotate Any Document				
	<i>Enables reviewers to collaborate electronically the way people traditionally do on paper by adding comments to documents or emails of interest.</i>	☑	☑	
Ability to Process and Review Native Lotus Notes E-Mail Files				
	<i>Process native Lotus Notes email messages without first converting to .PST, .TIF or .PDF format.</i>	☑	☑	☑
Classify Documents by using Customizable Document Tags				
	<i>Create issue tags specific to a matter to further identify and categorize key documents and emails as they're discovered. For example, use tags to explain why an email is responsive or why it addresses a second request topic.</i>	☑	☑	☑

ATTENEX PATTERNS v3.5 MAJOR NEW FEATURES

Social Network View

- See all the communication to and from selected individuals or organizations to quickly identify important relationships, key players and message flow.
- Identify all messages sent directly or indirectly between individuals and review the concepts that were covered.
- Social Network View is dynamically linked to all other Patterns views, enabling reviewers to learn more about how certain events unfold and how information travels through and between organizations and key stakeholders.

Social Network View window.

Timeline View

- Reviewers can see when emails were sent or received, when calendar appointments were scheduled and when documents were last modified with the Timeline View.
- Search on a particular topic and see when the communications took place.
- Timeline View is dynamically linked to all other Patterns views, helping the reviewer identify when key parties communicated about subjects of interest.

Timeline View window.

Enhanced Unattended File Processing

- Automate the bulk of administrative and technical document processing involved in cataloging, extracting, suppressing, indexing, analyzing and preparing electronic files for review.

Documents Organized By Concept in Cluster Folders

- Documents and emails automatically organized into folders based on content and similarity. Works alongside or in place of the traditional Patterns "dot" view.
- Cluster Folders are dynamically linked to all other Patterns views, enabling reviewers to quickly identify relevant groups of documents for immediate review. For example, select an interesting Cluster Folder and quickly confirm date sent on the Timeline View.

Expanded File Processing

- Review Microsoft Outlook Calendar appointments and .MSG files from Outlook PSTs to investigate meeting dates, attendance and email communication.
- Extract and review electronic content found in freestanding Microsoft Message files.
- Select files based on social network information, for example email communication between two particular organizations.
